The Revised Ordinances of the Village of Hampton

Compiled and revised by George F. McCartney, Paul P. Guckert, & Henry Nichols

1892

Preface

The undersigned were appointed by the Village Board to revise, codify, and compile the Village Ordinances of a general nature and prepare them for publication. Years have elapsed since the Village was first organized, and a revision of the Ordinances has taken place since, and a large part of the Ordinances were destroyed by fire in the year 1883. At every session of the Legislature, laws changing, conflicting with, amending with, and repealing each other have been passed so that a good, great many of our Ordinances were repealed, suspended, or rendered invalid by subsequent ones to the infinite annoyance and confusion of those interested in our Municipal Affairs. From this chaotic mass to compile existing state laws and revise and condense Ordinances now in force and prepare for publication necessary new ones has been our arduous task, and while the undersigned do not claim that this work is perfect, still they feel confident that it will be a saving of infinite labor to those who desire to inform themselves of the...

Ordinance No. 35 – Establishing Village Grades for Roads

An ordinance to establish the grades of the streets and alleys and sidewalks in the Village of Hampton and the track or right of way of the Chicago Milwaukee & St. Paul Railway where the same is located upon the streets, alleys or culverts of said Village.

Be it ordained by the President and Board of Trustees of the Village of Hampton:

Section 1

Whereas Robert W. Jones, a Civil Engineer, was employed by this Village to make a survey and map of the streets and alleys of said Village, establish the grade of the streets, alleys and sidewalks of the Village and in connection therewith to survey and establish the grade of the track of the Chicago Milwaukee & St. Paul Railway Company where the line of the railway right of way runs upon or across the streets and alleys of the Village and the culvert near Short Street.

And whereas he has completed his work and filed with the Clerk of this Village a survey and grade map of the streets and alleys dated June 14th 1902 showing the grade of the respective streets and alleys mentioned and noted thereon as established by him, all of which is indicated by certain red and black lines and further indicated and explained by certain figures in black, red and green ink which will more fully appear by reference to said map.

Now, therefore be it resolved that said survey and map, with the system and plans for the general grade of the respective streets, alleys and sidewalks of said Village as noted thereon be and the same is hereby adopted and the grade of the said streets, alleys and sidewalks as thereon indicated and established shall be and the same is hereby declared to be the established grade of said streets, alleys and sidewalks. Be it further resolved that the grade of the track of the Chicago Milwaukee & St. Paul Railway which runs through said Village as established by said survey and map and which is further explained on pages 34 & 35 of the book hereinafter mentioned as the line of said track upon and across streets, alleys and culverts of said Village be and the same is hereby adopted and approved.

Section 2

And whereas in connection with said map and survey and as explanatory thereof said Robert W. Jones has also filed with the Clerk of said Village a book endorsed on the cover as follows: "Hampton Grades 1902" and on the fly leaf thereof the following:
"This book forms part and parcel of the grade maps of Hampton and should be kept for reference with the records of the town. Robert W. Jones, Civil Engineer, Moline, Illinois June 14th 1902."

And whereas in said grade book the following appears on pages 2, 3, 4 and 5 as matter descriptive and explanatory of said survey and map, to-wit:

Description

1. The heavy black figures give the station number.
2. The small black figures give the elevation of the surface at points where they are placed.
3. The green figures give the distance between stations and from stations to the line of streets.
4. The red figures give the elevation of grade at the point shown by the same and at all points where only one set of figures are given, it signifies that the curbs, when set will all be of equal height.
5. At other points (where two sets of red figures are given) it shows that the curb corners are higher inside the street than on the other.
6. When the elevation given at one intersection is the same as that given at another point of intersection, then the grade between said points will be level for said block.
7. The grade for the center of the streets will be the same as the curb grades.
8. The property line grade will be (5) inches higher than the curb grades.
9. The curbs on a sixty (60) foot street should be fifteen (15) feet out from the property line, leaving a thirty (30) foot driveway between the curbs.
10. On Broad Street the curbs should be twenty (20) feet out.
11. On South Alley, the south curb should be ten (10) feet out from the property line, leaving a twenty (20) foot driveway on the north.
12. The data used for this work is an assumed elevation of 30.00 taken in the center of the hole in the United States Q.B.M. Number 11, and it is a copper bolt set horizontally in the stone foundation of the Baker & Hayward building at the northwest corner of said building in the 6th course from the ground.

PAGE 121

The Baker & Hayward building is on the west side of River Street and on the south side of North Alley. The letters U.S.B.M. mean United States Bench Mark.

The sidewalk grade is intended to be the same as the property line grade, which is five inches higher than the curb grade.

The elevation given on page 34 for the Chicago Milwaukee & St. Paul Railway is not the present elevation of the railway track at the points mentioned on page 34 but is the elevation now established by this map and survey so as to conform to the established elevations of the respective streets and alleys are now made.

And whereas on pages 6-7-8-10-12-14-16-17-18-20-22-24-26-28-30 and 32 of said grade book there appears certain matter explanatory of said map and survey as relating to the grade of the streets and alleys of said village as follows:
